Dear neighbour,

We're writing to update you on temporary closures affecting several public rights of way as construction of Eastern Green Link 1 (EGL1) continues.

The current closures affecting Seaton with Slingley Footpath 5, Murton Bridleway 5 and Murton Footpath 4 will now remain in place until early September.

Murton Bridleway 5

Murton Bridleway 5 will now close intermittently until early September. This will allow haul road and duct installation works to be carried out safely.

The bridleway will close for short periods as required and reopen as soon as it is safe to do so.

Murton Footpath 4 and Seaton with Slingley Footpath 5

Murton Footpath 4 and Seaton with Slingley Footpath 5 will also remain closed until early September.

The extended closures will allow our teams to carry out drainage works, remove topsoil and build temporary haul roads. These activities are needed before installation of the underground electricity cable can begin.

Keeping the footpaths closed helps protect the public while construction vehicles and heavy machinery are operating in the area.

Temporary Heras fencing will be installed around the work areas and inspected regularly. Signs will be in place at both ends of each affected footpath to explain the closure and direct people along the signed diversion route.

We appreciate your patience as we carry out these works and apologise for any disruption or inconvenience caused.

If you have any questions, please contact us on **0808 196 8405** or email us at **contact@easterngreenlink1.co.uk**.
